East Coast AIS positions by reported vessel class

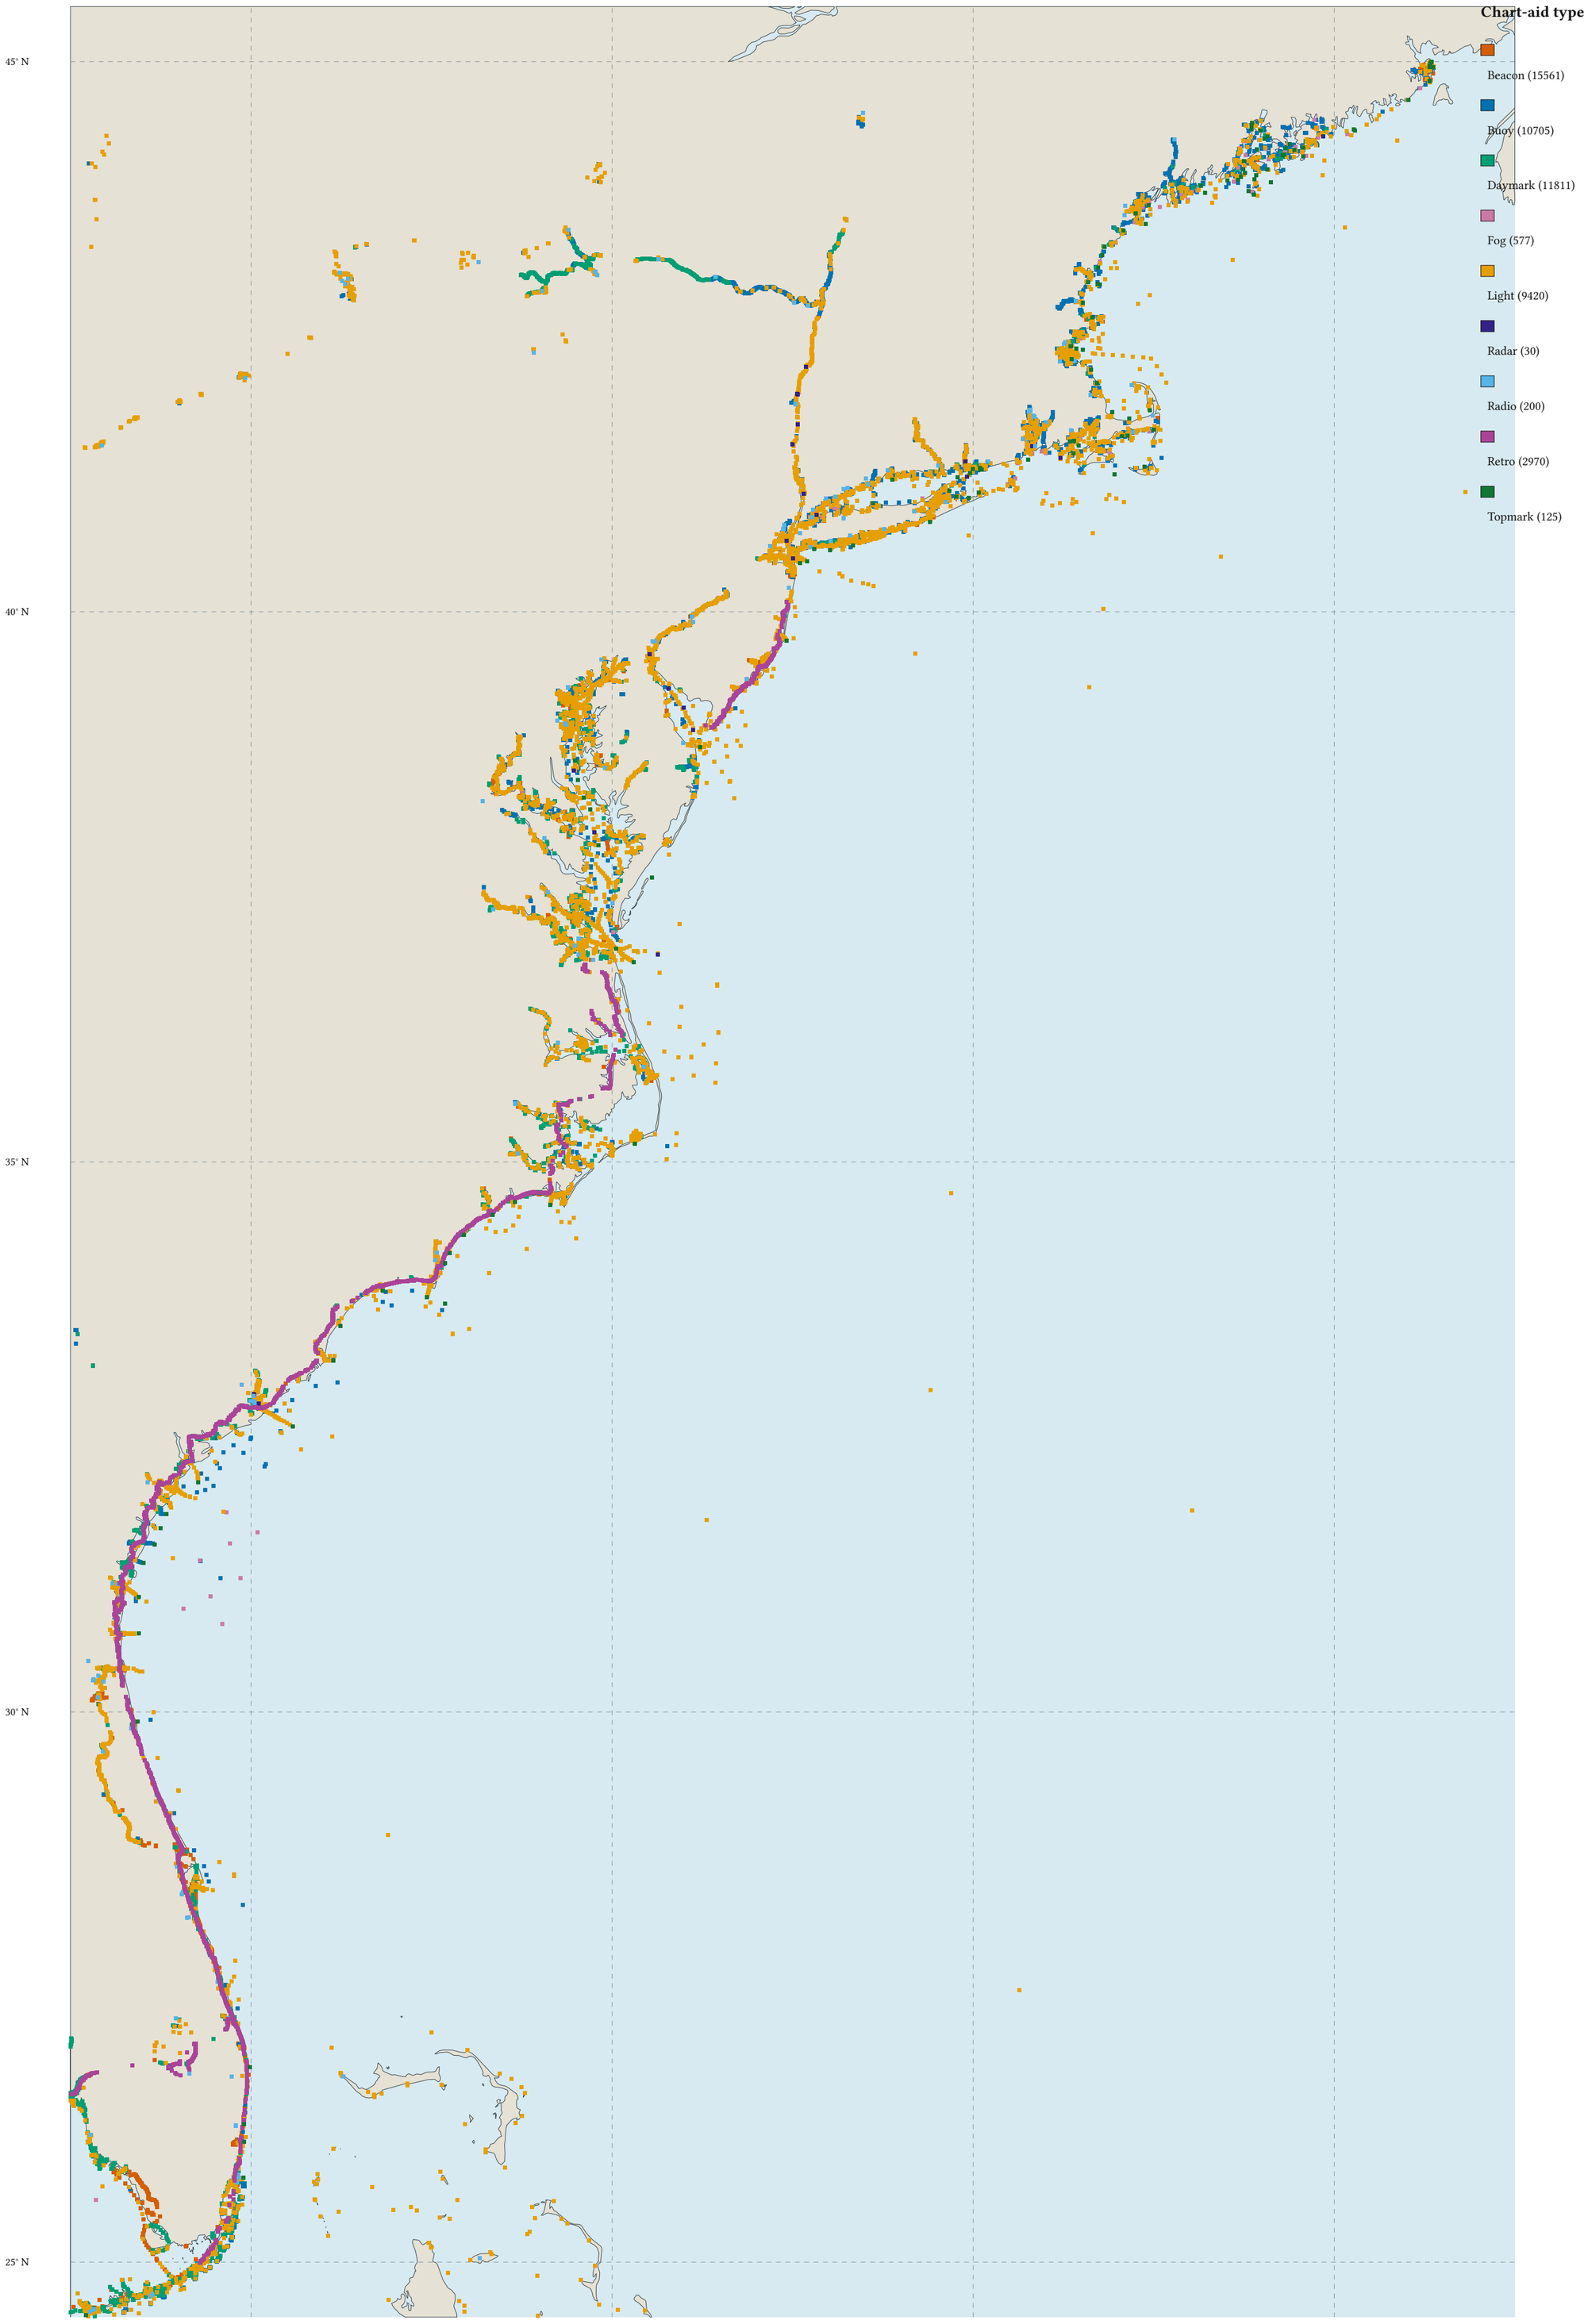

Single one-minute snapshot · 15 July 2023, 12:00–12:01 UTC · 2,268 vessel positions

AIS type codes are grouped into broad navigation classes. Open land/water basemap: Natural Earth 1:10m, version 5.1.1. This regional view is for data exploration, not navigation.

East Coast charted aids to navigation

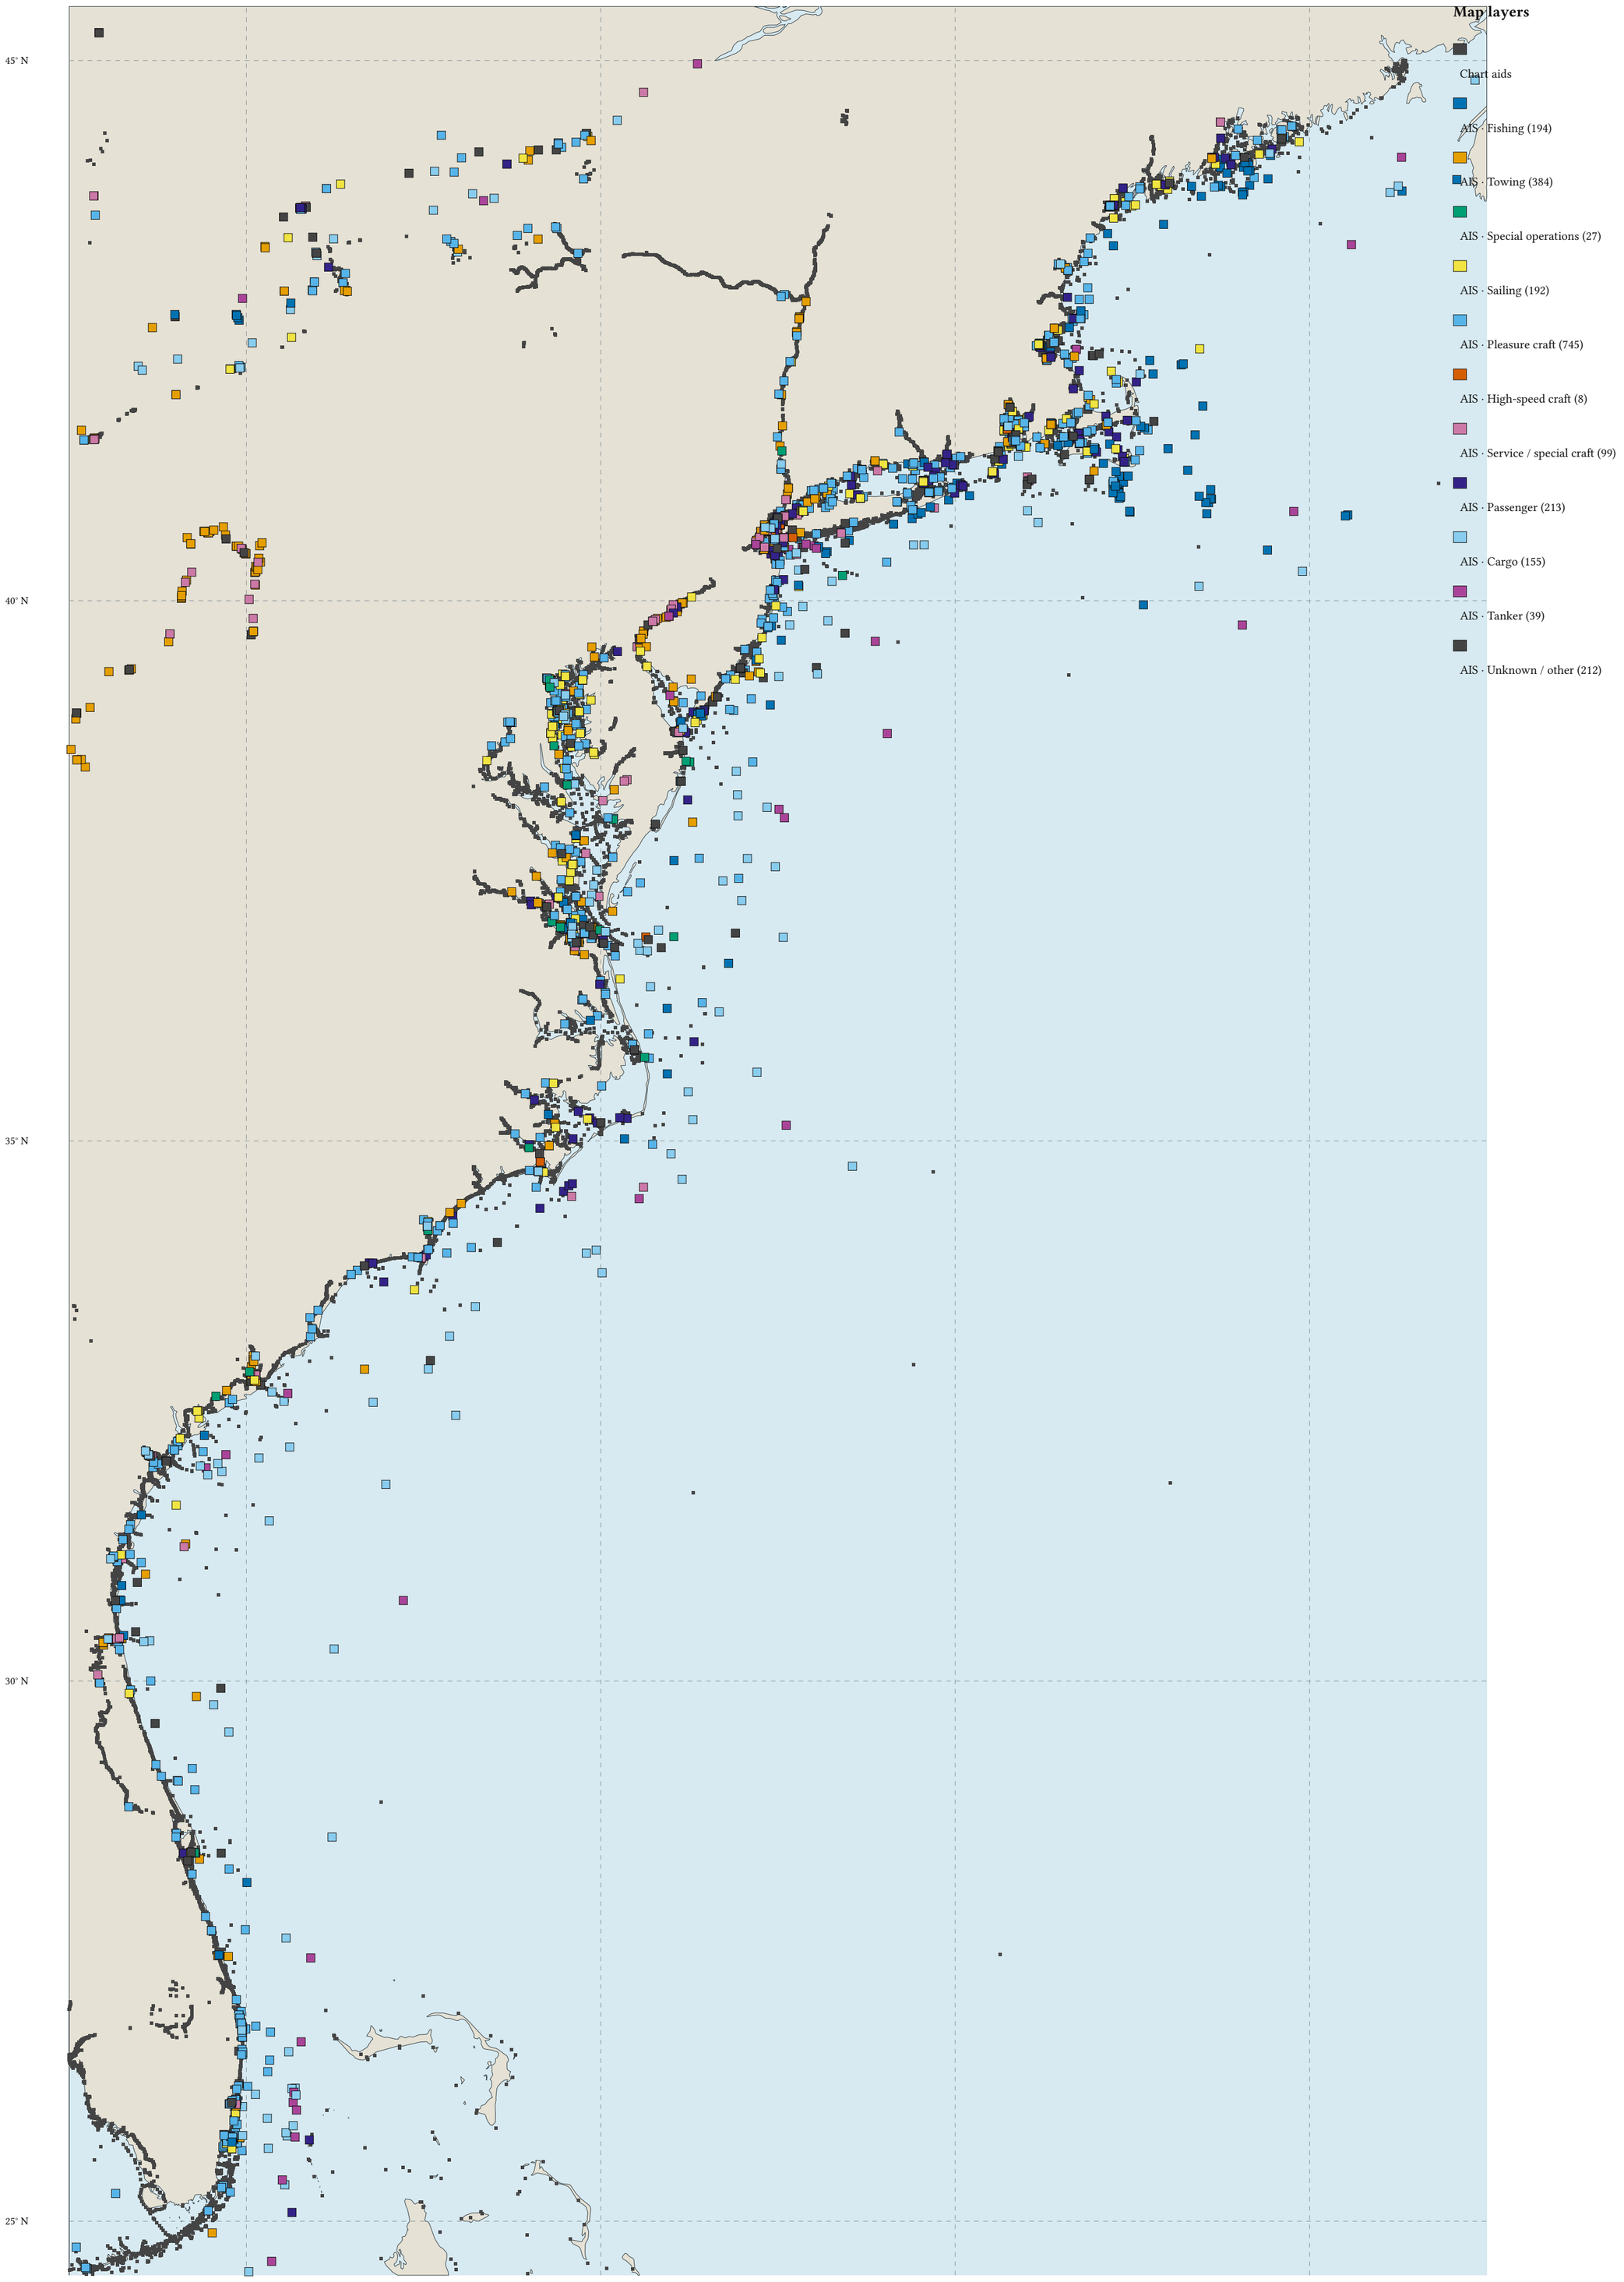

51,399 distinct plotted locations · grouped by NOAA ENC feature family

NOAA ENC Direct to GIS snapshot retrieved 24 October 2026. Cross-scale repeats were removed for this map by feature family and coordinates rounded to five decimal places. Basemap: Natural Earth 1:10m, version 5.1.1.

AIS positions and charted aids together

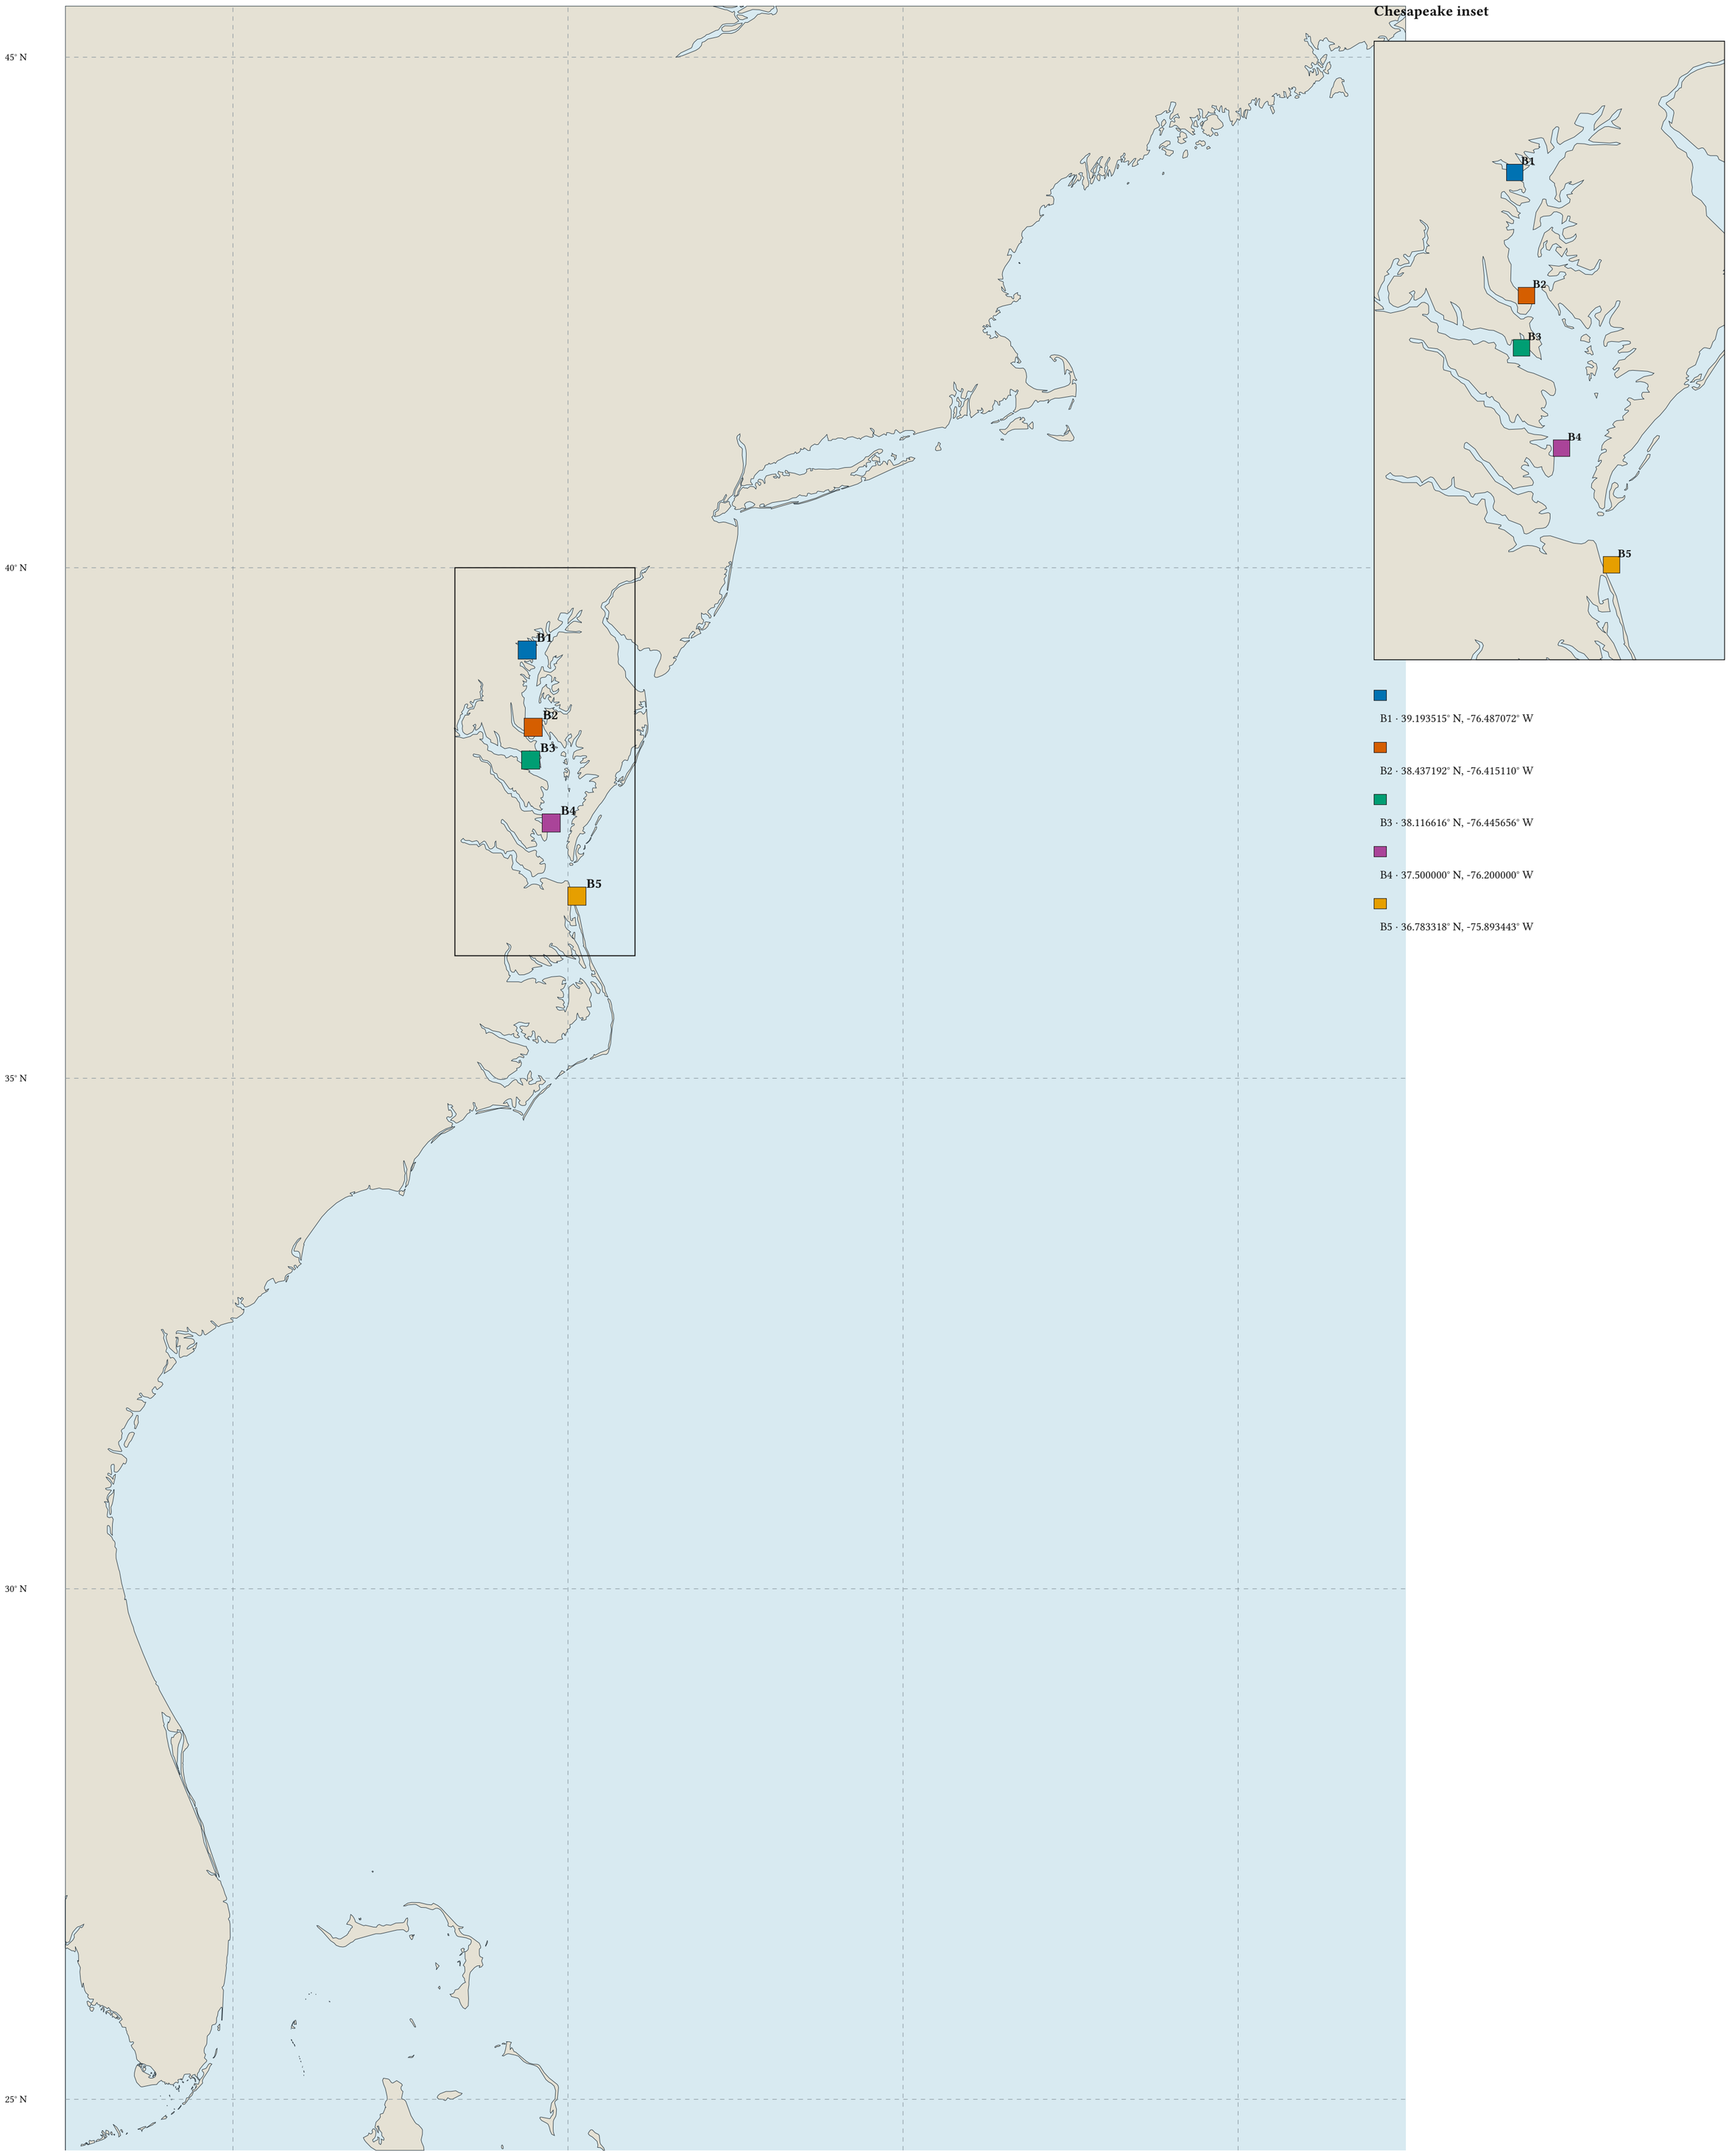

2,268 AIS vessel positions and 51,399 deduplicated chart-aid locations

AIS is plotted above chart aids so vessel classes remain visible where the layers overlap. NOAA ENC aid points include all six scale bands with cross-scale duplicates removed. Basemap: Natural Earth 1:10m, version 5.1.1.

B1–B5 observer locations

All five water-only test sites shown on the East Coast extent, with a Chesapeake Bay zoom inset

Site coordinates are from data/sites/b1-b5.csv. The inset shows the land/water coast context and the relative separation of the five test locations. Basemap: Natural Earth 1:10m, version 5.1.1.
