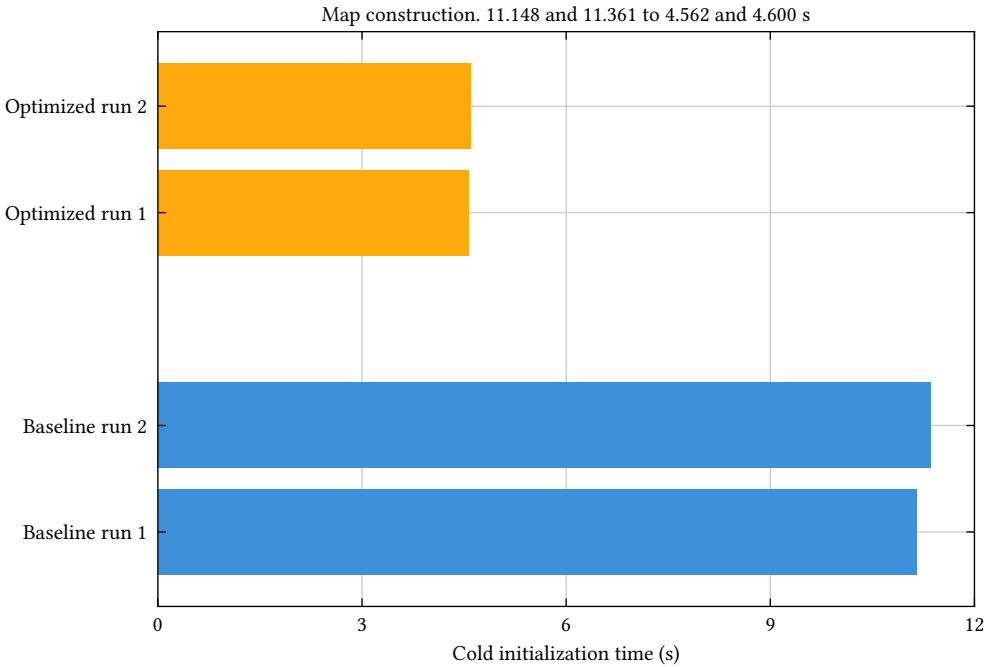
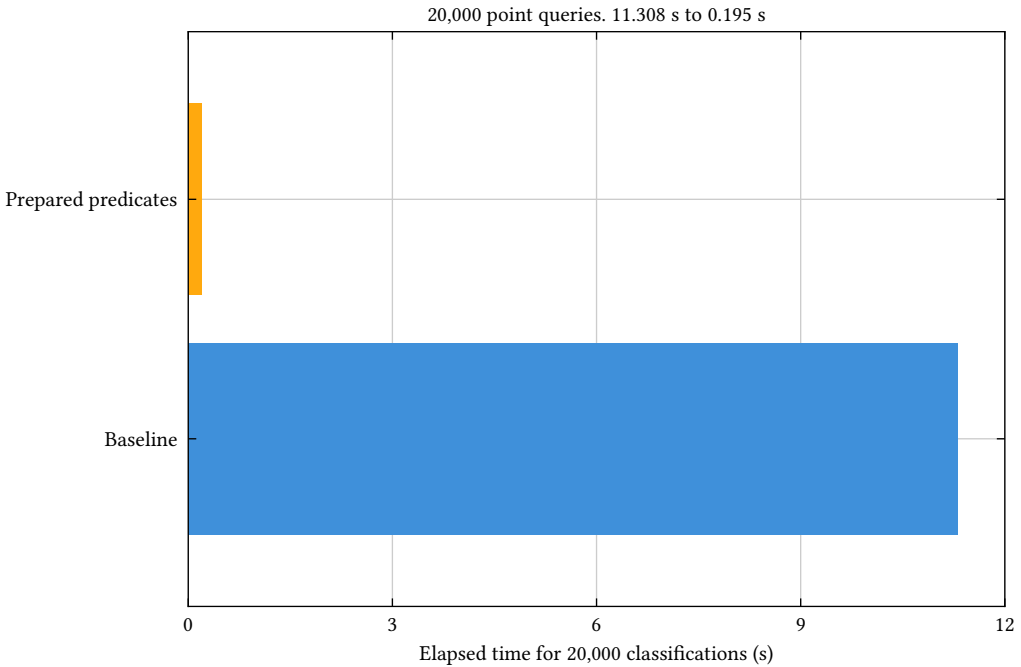
Exact vector-map acceleration diagnostic

Fixed-map CPU timings. 2026-10-26.





Query classifications	Before	After	Match
Water	11097	11097	Identical
Land	3177	3177	Identical
Unknown	5726	5726	Identical

Source: A45 exact-map profile report at commit 859e85c. Both cold construction runs produced 7,163 land polygon parts. Query classifications were unchanged while elapsed time changed from 11.308 s to 0.195 s. **These isolated timings do not measure end-to-end localization latency, search accuracy, or field performance. Both runs used identical map bytes and EPSG:32618.**
